<p>Extensions of time may be obtained under 37 CFR 1.136(a). The date on which the petition under 37 CFR 1.136(a) and the appropriate extension fee have been filed is the date for purposes of determining the period of extension and the corresponding amount of the fee. The appropriate extension fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action; or (2) as set forth in (b) above, if checked. Any reply received by the Office later than three months after the mailing date of the final rejection, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).</p>

Continuation of 11. does NOT place the application in condition for allowance because:

- (i) In view of the current reconsideration, the rejections to claims 2-4, 9-11 and 17-20 are withdrawn.
- (ii) The rejections to claims 1, 8 and 16 are remained. The arguments to claims 1, 8 and 16 presented in the response filed on 8/2/05 are not found persuasive because the applicant fails to show why the output 516 of flip-flop 512 in figure 5A of Goldrian cannot represent a relationship between delayed clock 511 before and after the transition of reference clock 515 as argued. It is noted that figure 4 of the present invention shows flip-flop 111 is used to determine the first relationship of the first data signal DIN1 before and after the transition of reference clock CLK. It is clear that the present invention uses flip-flop to determine the first relationship. Goldrian also uses flip-flop, therefore, it must be assumed that Goldrian's flip-flop 512 would perform the same function. In order for the argument to be found persuasive, the applicant must provide convincing evident to show that the Goldrian's structure could not perform the recited function.
